

Sample distribution:

Sampling statistics:

Sampling Process Summary:

- Center of sample means: 154.63 dollars (dashed green line)
- Confidence level: 95 %
- Confidence interval: 118.56 dollars to 190.7 dollars (light coral area)
- Interpretation: Approx. 95 % of such intervals would contain the true population mean.

Sample distribution shaded by 95% confidence interval:
